

Finny-Foo-Fars Beauty

Classic Lash Extensions Aftercare Advice

- To maximise the life of a set of Lash Perfect semi-permanent eyelash extensions, we recommend you carefully follow the information contained in this aftercare leaflet which will guarantee great results when followed correctly.
- We recommend you return to Finny-Foo-Fars Beauty Box of Loughborough every 10-14 days to check your lashes & have replaced any lashes that may have fallen out.
- As many as 50 -100 lashes can be applied to each eye. It is normal to experience the loss of a few lashes during the first 24 hours while the adhesive is setting. Care should be taken during this period.
- Avoid getting your lashes wet within the first 24 hours after application & avoid saunas & steam for the first 48 hours.
- Do not pick, pull or rub your lashes. You should contact Finny-Foo-Fars Beauty Box to have your eyelash extensions gently removed. The procedure is easy & will not affect your own lashes.
- Eye lash curlers **should not** be used. Lash Perfect lash extensions **should not be permed or tinted**. If you require an eyelash tint this should be done before application.
- Avoid using any oil based products around the eye area. When using your normal skin care products take care they do not contain oil.
- It is not necessary to wear Mascara but if you choose to do so we recommend you only use Lash Perfect Mascara which is specially formulated for use with lash perfect eyelash extensions. Waterproof Mascara should **NOT** be used. Feel free to rinse your lashes with warm water using the Lash Perfect Cleansing Cloth.
- Eye makeup should be removed with a specially formulated Lash Perfect Oil free Make Up Remover & a Lash Perfect Cleansing Cloth.
- Lash Perfect Finishing Glaze will give your lashes a light gloss while the brushing will keep lashes groomed. Finishing Glaze can be used regularly throughout the lifetime of your lashes.
- All aftercare products can be purchased from Finny-Foo-Fars Beauty Box.

The Life cycle of your lashes should follow the below routine.

- **Week 1-** Your lashes should look full for the first 10-14 days without the need for maintenance.
- **Week 2-** As your natural lash cycle begins to shed your lashes will start to look less full. This is the time when you should book a 15-30 minute maintenance session.
- **Week 3-** If you have chosen not to maintain your lashes, you will see your Lash Perfect eyelash extensions becoming more spaced & you will have to use mascara to give your eyes more impact. If you have maintained your lashes on week 2, the extra lashes attached will maintain a fuller affect. However, you will still experience a certain amount of falling, these will be the lashes that were applied 4 weeks ago & fall naturally as part of your hair growth cycle.
- **Week 4-** Towards the end of this week you will need a full on hour maintenance or a new set. If you have not had maintenance, then your set of lashes will be almost gone & you will need to pay for a new set as opposed to infills.
